DIRECTIONS FOR PLANTING

Gourd seeds should be planted after danger of frost is passed.

Plant in full sunshine, in light, rich soil, from one-half to one inch deep, according to size.

Cultivate plants until they begin to vine.

Guords do best if given a support—Trellis or fence.

Pick when stem turns brown.

NOTE—Purchasers of seeds living in Ohio, except farmers, must add sales tax.
Please do not send stamps.
